Now Enrolling: Acadia Study

A 14-week study to learn about irritability associated with autism spectrum disorder (ASD)

We're currently enrolling children and adolescents with ASD ages 5-17 for a clinical study involving an investigational medication.

The purpose of this study is to evaluate the effectiveness and safety of the study medication for the treatment of irritability associated with ASD, as well as the efficacy in the treatment of other symptoms associated with ASD, such as social and communication benefits and repetitive behaviors.

STUDY PARTICIPATION WILL INVOLVE:

- A total of (9) study visits that include:
 - (1) in-person screening visit at our campus
 - (7) study visits (2 may be remote or in-person at our campus)
 - (1) post-study follow-up phone call

ELIGIBILITY REQUIREMENTS INCLUDE:

- Enrolling participants ages 5-17
- Participant must be able to swallow a capsule
- A diagnosis of autism
- Participant experiences irritable behaviors

In-person visits take place at SARRC's campus located at 2225 N 16th St
Phoenix, AZ 85006
