

Brain Activity in Autism

Southwest
Autism
Research &
Resource
Center

WE NEED YOUR PARTICIPATION!

Right handed Adult Males with an ASD diagnosis.

Right Handed Adult Males without an ASD diagnosis or a family history of ASD.

WHY IS THIS STUDY BEING DONE?

Autism spectrum disorder (ASD) can be a distressing problem with many symptoms that often prevent people with ASD from having satisfying social relationships. We want to understand the underlying brain functioning that may help us to develop treatments for better cognitive and social functioning.

**All study procedures are covered through research funding.
YOU WILL NOT BE CHARGED FOR YOUR PARTICIPATION.**

**YOU WILL BE GIVEN A \$100 TARGET GIFT CARD AS A
THANK YOU FOR YOUR PARTICIPATION**

Contact Dr. Leslie Baxter, at Barrow Neurological Institute, or Dr. Christopher Smith, at the Southwest Autism Research and Resource Center, and a member of our team will discuss the study with you in great detail.
