

## Now Enrolling: MEASURE-ASD Study

### *Research study for children who are typically developing or who have an autism diagnosis*

This study will examine if a new investigational medical device, called the EarliPoint™ Assessment for autism spectrum disorder, can be used to monitor a child's treatment progress (over time). The device detects the presence and severity of autism spectrum disorder and related developmental delays.

### Study Overview

The EarliPoint™ Evaluation for Autism Spectrum Disorder (the device) tracks where children are looking as they watch videos on a screen, which shows us how typically developing children and children with autism visually explore the world differently. This study is looking at whether the device, when repeated over time, can be used to monitor a child's treatment progress.

To participate in the study, you will be asked to review an Informed Consent document which explains all the details of the study. If you agree to allow your child to participate, you will be asked to sign and return the consent document to the researchers. You and your child will be asked to attend seven (7) study visits over a 6-month period. During each visit, you will be asked to complete several questionnaires about your child's development. Your child will undergo testing by the EarliPoint device, and the researchers will observe and evaluate your child's developmental status.

#### Your child may be eligible to participate if they:

- 15-78 months of age (at time of consent)
- Typically developing or has a diagnosis of autism spectrum disorder (ASD) and is established in treatment
- Physically able to sit in a chair, high chair, or booster seat at a table and watch age-appropriate videos on a screen
- Has normal or corrected-to-normal vision and is able to hear information and has no history of seizures

Study visits will generally take 3-4 hours, with some visits taking 1-2 hours. Study visits occur monthly over a 6-month period.

This study is publicly registered at [ClinicalTrials.gov](https://clinicaltrials.gov). ClinicalTrials.gov ID: NCT05675371.
