

Now Enrolling: Observational Marijuana Safety Study

Southwest Autism Research & Resource Center (SARRC) is currently enrolling adults ages 21+ who use marijuana at least once a week to investigate the risks associated with marijuana use over an 18-month period.

Study sponsored by SARRC.

STUDY PARTICIPATION WILL INVOLVE

- (8) in-person visits over 18 months at our campus
- Safety exams (i.e. blood draws, physicals, vitals, etc.)
- Logging use of marijuana in study diary
- Completing assessments of cognition and social/emotional behaviors

WHO WE ARE

SARRC's research program brings together scientists, research methods, and stakeholders to gain a better understanding of possible causes of autism, identify better treatments, and educate others about how to improve the quality of life for those impacted by ASD and their families.

**In-person visits take place at SARRC's campus located at 2225 N 16th St
Phoenix, AZ 85006**
