Pediatric Sleep Difficulties Study

The Southwest Autism Research & Resource Center (SARRC) is currently enrolling children ages 2 to 17 who regularly struggle to fall asleep at least four nights per week.

STUDY SNAPSHOT

- Participation includes seven telehealth visits and five in-person visits at SARRC's campus (2225 N 16th St, Phoenix, AZ 85006)
- Routine blood draws and health examinations are completed throughout participation
- To be eligible, children must have insomnia disorder or experience sleep difficulties at least four nights per week
- Study participants will receive compensation for their time
